

# HP discontinues a number of it's LaserJet line...

## Let us help you switch out of these out of date printers before your cost of ownership on these machines rises dramatically.

Over the past several months and continuing on in to the summer HP will be discontinuing a number of it's LaserJet line. We are notifying you of this because as of **October 1st, 2007** we will no longer be covering the printers listed below on our Total Imaging Care (TIC) Program.

So what are you to do? Well here at IOT, realizing that this will become an issue for a number of our customers, we've created some easy and pain free options to update your office to current hardware. We have a large stock of high quality refurbished HP LaserJet printers from their current line of products for you to choose from. We offer a low acquisition cost and the best part is that you can put these refurbished machines on our TIC Program and not skip a beat with our service and repair. You'll still pay one low price for our PEAKTONER brand toner cartridge and get all of your service, parts & labor free.

Contact your account manager today to learn how to make an easy transition to current hardware.
